P. O. Box 3713, Regina, SK S4P 3N8
Phone: (306) 781-2429 Fax: (306) 781-1933**

Carson Energy Services' Horizontal Directional Drilling has a branch located in Emerald Park, 18 kilometres outside Regina.

The Emerald Park facility, which employs 24 fully trained individuals, has a 12,000 square foot shop, as well as a yard for equipment.

The Emerald Park location specializes in work projects 80,000 lbs and under, but CES is willing to relocate units as necessary in order to complete any size or type of job required for construction maintenance and horizontal directional drilling, even on short notice.

CES has a comprehensive safety program, which is administered by a Corporate Safety Officer, ensuring that all industry requirements are met or exceeded at all times. All CES employees are fully trained and certified in required safety areas.

The Emerald Park location performs a variety of tasks, from horizontal directional drilling, specializing in telephone, cable, fibre optic, power, gas, pipeline, water and sewer, and soil remediation and sampling, to hydrovac work, excavation, chain trenching, frozen line thawing, water washing (steam trucks), asphalt cutting and pipe ramming.

To discuss how Carson Energy Services can play an integral role in your upcoming projects, please contact one of our staff members below:
