Daily crew work in the oilfield maintenance area involves an abundance of tasks required to maintain the equipment and assets of our clients.

Tasks vary from setting pumpjacks and repairs, working on treaters, tanks, and compressors, doing battery and satellite construction, to duties such as general pipe fitting, well inspection, gear-box changes, steaming and snow removal.

Road maintenance, gravelling, culvert and Texas gate installation all form part of the oilfield maintenance division's work.

As well, we clean up oil spills, repair line leaks and do site reclamation.

Gas plant, compressor stations and treater turn arounds are annual maintenance projects performed by the Oilfield Maintenance Division. These involve repairing of vessels, piping, tanks, and associated equipment.

Although CES is able to perform oilfield maintenance work at any of our locations, the branches which do the majority of this work are Lampman, Halbrite, Carlyle, Estevan, Swift Current, and Wainwright.

crew truck

Our foremen and labourers are fully equipped with one- to three-ton trucks, outfitted with knuckle picker and hand tools.

Each truck is also furnished with a range of personal protective equipment including Breathing Air systems, H₂S monitors, safety harnesses, lanyards and communications devices.

CES also provides safety personnel and trailers for maintenance tasks which require them, and larger equipment such as picker units, man baskets, spreaders bars, graders, backhoes, unloaders, track hoes, side booms, sand blasters, steamer, welding units, man lifts, pressure truck units and hydro vac units.

Among our valued oilfield maintenance clients are:

- Apache Canada
- Advantage
- Arc Resources
- Atco Midstream
- Bayhurst Energy
- B.P. Canada
- Cenovus
- Conoco Phillips
- C.N.R.L.
- EnCana
- Enbridge Pipelines
- Enerplus
- Husky Oil
- N.A.L. Resources
- Penn West
- Petro Bank
- Petrobakken
- Plains Midstream Canada
- Taqa North
- TransGas
- Tristar Oil & Gas
- Tundra
- Zargon
