

REGINA LOCATION

**315 Hodsman Road
Regina, SK S4N 5W5**

Phone: (306) 543-3655 Fax: (306) 569-0844

Carson Energy Services' Horizontal Directional Drilling division is centered just outside of Regina at Emerald Park, although the Company also has HDD locations in Saskatoon, Lampman and Regina.

The Regina location, at 315 Hodsman Road in the city's north end, includes an administrative office, fully equipped 3,000 square foot shop and two yards.

While the majority of the Regina location's work is doing projects 40,000 lbs and under, CES is willing to relocate units as necessary in order to complete any job required for construction maintenance and horizontal directional drilling, even on short notice.

The majority of CES' horizontal directional drilling employees have

more than 15 years' experience, and the Company's stringent safety program is administered by a Corporate Safety Officer.

The Regina location focuses mainly on horizontal directional drilling, specializing in telephone, cable, fibre optic, power, gas, pipeline, water and sewer, and soil remediation and sampling, but also performs hydrovac work, excavation, chain trenching, frozen line thawing, water washing (steam trucks), asphalt cutting and pipe ramming.

To discuss how Carson Energy Services can play an integral role in your upcoming projects, please contact one of our staff members below:
