*Water injection header*

From a single welding truck operated by the Company's founder, CES has grown exponentially in the area of Shop and Field Facility Fabrication, today servicing clients in all three prairie provinces.

Carson Energy Services' Lampman, Halbrite, Carlyle, Alida, Swift Current, Wainwright, and Lloydminster locations all provide Shop and Field Facility Fabrication services, ranging from batteries to gas plants to refineries – essentially, any aspect of the collection and treatment of gas or oil.

Each location has all of the necessary equipment to provide a full slate of fabrication services, including welders, hoists, cranes, bevellers, forklifts, trolleys, cutting torches and rollers.

Within the southeast part of Saskatchewan, CES has 25 employees who hold permanent pressure ticket welding certification.

CES is proud to have an outstanding relationship with our employees in this area. Three of the Company's welders have been employed with us over 30 years, six have more than 20 years' experience with CES, and the remaining 16 have been working with the Company for a range between five and 19 years.

*Water injection skid package*

**Emulsion header/treater/separator/skid package**

All jobs requiring pressure welding conform to ASME standards, while non-pressure fabrication jobs conform to Canadian Welding Bureau codes.

Pressure components require notification to the provincial Boiler & Safety Division.

All spools are fabricated using registered weld procedures.

Among the clients we're proud to have worked with are:

- Advantage Oil & Gas
- Apache Canada
- Arc Resources
- ATCO Midstream
- BP Canada
- Conoco Phillips
- C.N.R.L.
- Crescent Point Energy
- Enbridge Pipelines
- EnCana
- Enerplus
- Husky Oil
- N.A.L. Resources
- PennWest
- PetroBakken Energy
- Taqa North
- Tundra
- Zargon
