Carson Energy Services' Site Preparation & Civil Work Division primarily covers oilfield lease construction work, road construction and rough site prep for facilities, as well as having the capacity to do certain areas of civil construction (such as digging out sewer and water lines for repair or construction, and executing the earthwork for new subdivisions).

MULTIPLE LOCATIONS, SPECIALIZED EQUIPMENT

While the division is most active in the Lampman and White City locations, Wainwright and Swift Current also have the capability. The Company has specialized equipment such as scrapers, cats, hoes, graders and packers are readily available. Also accessible are hydrovac, directional boring equipment, plows, wheel ditchers and chain ditchers, fusing machines and other major construction equipment with a range of uses. The Iron Wolf Mulcher, for

Iron Wolf

example, mulches trees and brush, but also mulches frozen topsoil for pipeline topsoil removal.

QUALIFIED, LONG TERM EMPLOYEES

The employees within this division have longevity with the company – some are over 20 year employees.

Each individual has been trained in accordance with safety requirements, and is experienced on each piece of machinery with which they work.

PROVEN RECORD

The Company has done site prep work for valued clientele such as:

- Atco-Midstream
- Alliance Pipelines (Alameda site)
- NAL (Alida facility)
- Frontier Peterbuilt (Estevan)
- Enbridge (various southeast SK & western Manitoba sites)
- Husky Oil (various southeast Saskatchewan locations)

Other valued clientele include municipalities such as Lampman and Arcola, and TransGas (Melville compressor site).

SAFETY FIRST

Rigorous Carson safety guidelines are always adhered to, and the division is also able to follow any client-specific guidelines required to complete the job.

Carson Energy Services has always committed to being an industry leader in safety standards.
